Portland State's CTF Slack channel [here](#)

What is the security advantage of passing in the secret proxy route as an environment variable?

Passing the secret proxy route as an environment variable means that you don't have to include the secret in the docker image. This means you can share the docker image publicly without revealing your secrets.

Cloud Build and Container Registry

[←](#) Images [DELETE](#)

i Container Registry is deprecated. After May 15, 2024, Artifact Registry will host images for the gcr.io domain in prod

What port do container instances listen on?

8080

What are the maximum number of instances Cloud Run will autoscale up to for your service?

100

06.4g: Cloud Functions, PubSub

After downloading the file from the bucket, where is it stored?

In a temporary local file.

What class in the ImageMagick package is used to do the blurring of the file?

The Image class is used to blur the file.

What lines of code perform the blurring of the image and its storage back into the file system?

Lines 72-74 blur the image and save it to a temporary local file. Lines 81-84 upload the image to a storage bucket for blurred images.

Test function

PubSub via CLI

Why are no items returned?

Because when the first message was created there were no subscribers, so the message was deleted.

What is the `messageId` of the published message?

```
messageIds:  
- '8995000122789725'  
awurtz@cloudshell:~ (cloud-wurtz-awurtz)$
```

Screenshot of the output of successful pull that includes the message and its `messageId`

```
awurtz@pubsub:~$ gcloud pubsub subscriptions pull sub-$USER
```
